

RSL Music Practitioners Technology

Qualification

Music Practitioner Certificate
(Equivalent to a GCSE at grade C or higher)

Exam Board

RSL - Rockscool

What Will You Do?

You will learn and experience how to be a confident musician/ arranger for today's pop industry. You will compose, arrange and re-mix music using MIDI and audio.

You will investigate various styles of music of, comparing songs and discovering what makes each style unique.

You will also learn how to set up the studio to record music and will produce your own multi-track recordings, develop your individual musical talents and research the music industry and its importance in today's culture.

Assessment Details

Assessment is through the completion of a coursework portfolio. You will produce a portfolio of work that can show that you have achieved all of the skills required to pass the course.

Your portfolio will include:

- Practical work such as recordings and songs that you have produced
- Written reports and project logs with screenshots evaluating your practical work and explaining the techniques you have used in your music
- Written projects on musical careers and the history and development of popular music, comparing a number of styles.

Is Music Technology for you?

Have you enjoyed writing your own songs in music lessons, or using the technology and creating your own music using Logic Pro?

Have you ever wanted to work in a recording studio?

Are you interested in using computers to write or mix music?

Do you want to learn more about the history and development of popular music?
